I'm a Software Engineering graduate who loves turning ideas into real solutions through technology. My background in programming, software design, and project management has built a solid base for my current exploration into machine learning. I'm excited to keep learning and apply my skills to create smart, practical systems that make a difference.

EDUCATION

Bachelor of Software Engineering

Telkom University, Bandung, Indonesia

Sep 2019 - Sep 2023

Master of Computer Science and Information Engineering

Tamkang University, New Taipei City, Taiwan

Sep 2024 - Present

RELEVANT EXPERIENCE

Frontend Developer

Capstone Cafeasy

Bandung, Indonesia

Sep 2022 – Sep 2023

- Developed and maintained front end components.
- Contributing to its overall performance and usability.
- Contributing to the overall architecture and design of front-end systems.
- Collaborating with design and back-end teams to ensure seamless integration of user interfaces with underlying systems.
- Collaborated with cross-functional teams to implement new features.

FGA - Data Analyst

Digital Talent Scholarship

Bandung, Indonesia

Sep 2022 – Nov 2022

- Independent Study: I carry out independent learning, setting my own implementation schedule during the training period.
- Live Sessions/Webinar: Interactive online sessions where I engage directly with the instructor for guidance and interaction.
- Practical Labs: I work on work projects, either individually or in groups, to apply my learning.
- Class Group: I joined a group to interact with the Organizing Committee, Instructor, and fellow DTS participants.
- Exams: Participants undergo assessment through quizzes, exams, or project completion.

Student Internship

PT Batulicin Enam Sembilan Group

Jakarta, Indonesia

June 2022 – Aug 2022

- Migrated and analyzed data: to extract insights, identify patterns, or make decisions based on the information contained within the data.
- Redesigned the user interface using Figma: the layout, appearance, and functionality of a digital interface (such as a website, app, or software) were modified or improved using the design tool Figma..

SKILLS

- Technical Skills : JavaScript, Python, HTML, CSS, React.js, Node.js, Git, SQL, Figma, UI/UX Design, Data Analysis.
- Soft Skills: Communication, Teamwork, Problem-solving, Adaptability, Time Management, Creativity, Continuous Learning.
